U.S.A

A THANK YOU NOTE

I feel so fortunate to have been chosen as a recipient of the James Hook Memorial Grant through the AAPG Grants-in-aid award. Thank you so much for your generosity in funding this grant.

With your help, I am now able to pay for and have started analytical work on my research entitled “An integrated study of the calcareous nannofossil response to short-term paleoceanographic changes recorded in the Upper Jurassic Haynesville Formation, North Texas, East Louisiana, USA” . I hope to complete all nannofossils, geochemical (stable isotopes), thin sections and scanning electron microscopy (SEM) analyses and report in July, 2011. It is not easy to carry out an integrated research of this nature because of the cost of analyses and I am truly grateful for the assistance that I am receiving because of your benevolence.

Thank you again for so generously contributing to the AAPG Grants-in-aid.

Sincerely,

Aisha Ejura Agbali
