

May 10, 2011

Dear Ohio Geological Society Foundation Board of Trustees:

Thank you for awarding me the Ohio Geological Society Named Grant. The grant awarded to me will be used to fund the Palynological processing of eleven Jurassic Namibian samples. These samples were processed by the University of Missouri. The bill received totaled \$500.00. The results from these analyses will hopefully provide the absolute age of the sediment deposition of the two studied interlayers within the Jurassic Kalkrand Formation. Without monetary support from organizations like yourself this project would not be possible.

Thank you again.

Sincerely,

Heather Weismiller
