Dear Warner Family,

Thank you for your generous donation to AAPG's Grants In Aid program. I really appreciate your support of graduate students at the University of Wyoming.

The grant I received will be used primarily to fund my field work this summer. I am now able to investigate field relationships and gather samples for strontium isotope work and thin sections. These valuable tools will aid in my assessment of the confining ability of Permian and Triassic strata, specifically the Goose Egg and Dniwoody formations, for proposed carbon sequestration sites in southwestern Wyoming.

I am very excited to view the sections I have been diligently reading about these past two semesters. Without the help of your generous contribution, I would not have this opportunity. Thank you again for your donation to the Grants In Aid program.

Sincerely,
Dynsey J. Spaeth
