Dear Board of Trustees,

I would like to express my gratitude to the AAPG Foundation Board of Trustees for accepting me into the Grants-in-Aid program. I was very excited and appreciative when I received notice of the generous \$3000 award from the John Teagle Memorial Grant.

I am a Ph.D. student at Saint Louis University and am exploring fluid-rock interactions in a fault zone. I will use this award to analyze the geochemistry and mineralogy of drill core samples from a CO₂-rich reservoir in central Utah. This work combined with results of my field work, other laboratory analyses, and computer modeling, will help me to determine what mineralogical and textural changes has been occurring in the fault zone due to the flow of the CO₂-rich fluids from the reservoir to the land surface.

Thank you again for your support and generosity. I will work hard to complete this project in a timely and effective manner.

Sincerely,
