

# Help Assure the Future of Geology for Geoscience Education!

**Your tax deductible\* contribution to the AAPG Foundation is vital to the success of key energy and earth science educational programs. By adding a Foundation contribution to your 2011 dues statement, you'll make a meaningful difference to thousands of students and geoscientists around the world, providing the resource of funding to support and benefit the geoscience profession and the general public.**

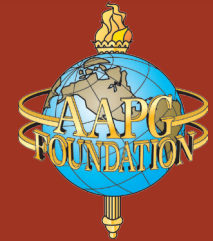

Dear AAPG Member:

Your dues statement includes a suggested contribution to the AAPG Foundation. The amount of the suggested contribution is based on two dollars for each year of membership in our Association. Contributions are strictly voluntary, and should you not wish to contribute, simply strike through the amount and deduct it from the total amount due. The Trustees are very grateful for the contributions made by AAPG members when paying their dues as it is essential to the continuing tax exempt status of the Foundation that our support base be broad in terms of number of individual contributors. Therefore every contribution – small or large – is important. Please take a moment now to look for the “AAPG Foundation Contribution” line on your dues statement. Then check the fund you wish to support. Fill in your contribution and join fellow AAPG members in support of geoscience education!

\*Contributions to the AAPG Foundation are tax deductible for U.S. taxpayers. Tax laws vary in other countries. Check with your tax professional for advice.

All donations that accompany your dues statement will be placed in the general fund unless a designation to a specific fund is noted. Donations may also be made online at [foundation.aapg.org](http://foundation.aapg.org).
